

Mosaic5G.io

Enabling Agile 4G/5G Service platforms

Navid Nikaein

Professor, Eurecom

Board Member, OpenAirInterface

Coordinator, Mosaic5G

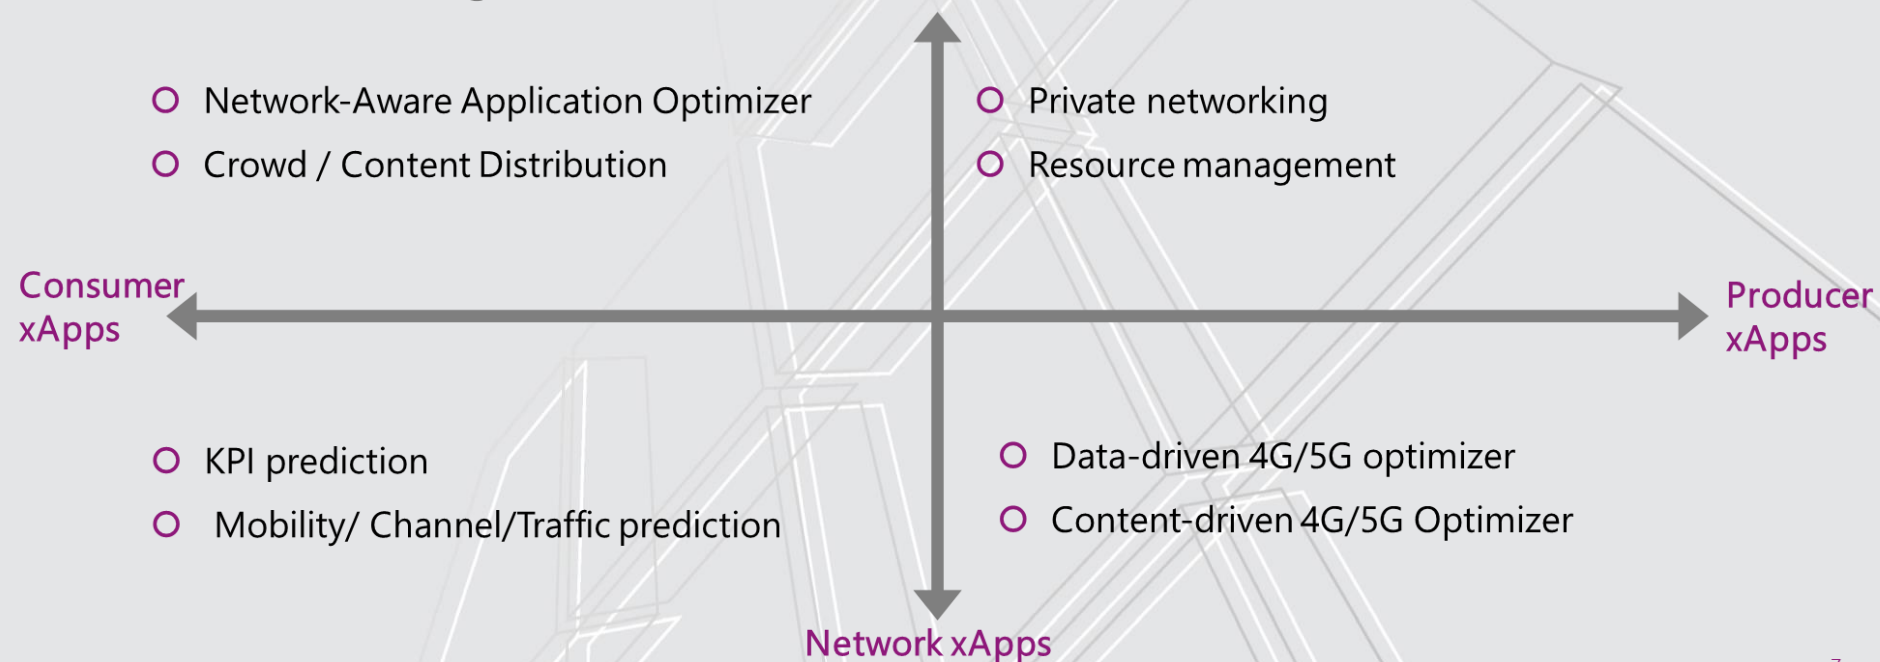

Workshop Warp up

- Many use-cases are becoming possible with OAI/M5G **available freely**
- OAI/M5G are now **cloud-ready** for Ubuntu and RH/CentOS, many flavors exists
- With the current software platforms, it is possible to **bring ideas into existence**
 - Composing and customizing the network service delivery platform
 - Automate deployment
 - Developing xApps

Workshop Warp up

- Today is easy to create a 4G/5G infrastructure and reproduce the use-cases in your premises
 - Reproducible **cloud-ready images** from infrastructure to services
 - from zero-conf deployment to auto-pilot with **Kube5G**
 - Fast innovations leveraging **M5G SDKs coupled with reusable and extendable xApps**
 - **Data-driven** networking and control (ML/AI)
